

VISION CARE

Alberta Blue Cross offers many different types of vision packages. Vision coverage can be relatively inexpensive while forming an attractive component of your benefit plan.

Our vision coverage includes such items as eye examinations, purchase or repair of eyeglasses (frames and/or lenses), contact lenses or intraocular lenses. You can choose plan maximums—anywhere from \$40 to \$250—and include employee co-payments if you wish.

Because Alberta Blue Cross is based right here in Alberta, you also get the advantage of our ability to respond quickly to changes in provincial health policy which could affect your coverage.

Plus you get the added advantages which come from being covered by Alberta's leading provider of supplementary health benefits:

- access to a full range of benefits, including health, prescription drugs, dental, vision, employee assistance, health spending accounts, outside Canada emergency medical assistance—plus group life, disability and accident coverage
- no built-in profit margins and no premium tax
- best price agreements with many health service providers
- hassle-free plan administration
- efficient and excellent service
- in-house plan expertise
- and much more... .
